Sod Limited Warranty

We at Dresen Landscaping take pride in our work and the products that we use in all our projects. We only install healthy thriving 3-D Sod Blend grass.

Due to the perishable nature of any sod we must receive notification within 30 Days of installation that you are having a problem. To qualify for replacement Sod all of the following must be true:

- Proper watering must be applied to the sod – See attached How to Care for Sodded Lawns.
- Sod was not trampled on or traffic of any kind (Animals, Pedestrians, and Automobiles etc.)
- Sod was not burned by chemical, pesticide, fertilizer, or reflected sunlight from a home foundation or concrete.
- Pets were not allowed to soil on the lawn.
- No acts of God – Excessive flooding, fallen tree, wind etc.

At the first sign of Sod damage you should contact our office and we will assess the situation in person. We may ask you to increase or decrease your watering days or amounts, or implement some other corrective measure to alleviate your problem. We must assess the situation before you will qualify for replacement sod. If after these steps have been taken, the problem persists, we will schedule a time to replace the Sod.
